Geiger One™ Casegoods

Custom fit, finish, and functionality
made standard

Geiger One Casegoods

Geiger One is a new concept in casegoods design. We envision it as a blank slate for designers to use with their clients to create their own solutions for a variety of spaces—private offices, open plan, even collaborative areas. The starting point wasn't a particular aesthetic or application, but a versatile infrastructure that can be built upon using a standard kit of parts to create spaces that feel custom.

Standardized Kit of Parts, Customized Feel

Perhaps more than any other category of office furniture, casegoods are less about products and more about solutions. Often, these solutions are specially crafted for clients. At Geiger, this has typically meant working directly with interior designers to pull together parts and pieces from various product lines to create something unique that meets their clients' specific needs in terms of fit, finish, and functionality. With Geiger One, we've taken what we've learned and used it to inform a new approach to casegoods design.

Applications Accepted

The extent of the Geiger One offer was driven by the functional needs of organizations today, and its kit of parts was built around meeting those needs. The backbone of the system is its wall frame with easy fascia connections. In open plan applications, this frame provides structure, allowing Geiger One to create freestanding reception/admin stations, benching applications, or collaborative spaces such as coffee bars. In private offices, the same frame can be affixed easily to architectural walls. Not only does this approach allow the Geiger One kit of parts to cover the entire office floorplate, it also reduces install time.

Geiger One Private Office

Ideal for small spaces that support focused work or small group collaboration for one or more people in the room, as well as storage and organization—including private offices, executive suites, or small shared workspaces.

- Takes into account the needs of guests by providing storage and power access on both sides of the desk.
- Built to create different private office configurations with different set of needs while remaining aesthetically cohesive.
- Mix of colors, materials, and finishes—including wall tiles, soft-touch laminate top, and back-painted glass panel—speaks to the functional and aesthetic range possible within Geiger One's offering.
- Provides consistency across the office floorplate.

Geiger One Meeting Room and Huddle Rooms

Addresses the needs of a range of meeting and huddle room spaces—from large, formal conference rooms to smaller, casual collaborative settings.

- Design a space within a space with partitions, glass walls, and tiles that establish an area.
- Integrated technology to enhance collaboration.
- Visual cohesion from private office to open plan to conference room creates a unified look across the office floorplate.

Geiger One Open Plan

Beyond the private office, Geiger One's kit of parts can be used to create a wide variety of open plan environments, including admin stations, benching applications, or reception areas.

- Addresses common setups in an open plan, such as reception stations, mirrored two-packs, and benching four-packs.
- The wall frame provides structure, allowing Geiger One to create freestanding applications.
- Includes premium standard components that can be configured and specified to meet the needs of a range of clients

Walnut wood organization trays add beauty and a sense of order

All cables are shrouded to eliminate visual noise beneath the work surface

Sit-to-stand work surfaces are part of the standard kit of parts

All drawers feature soft-closure with under-mount slides

Floating metal shelves are fully repositionable

Freestanding Parsons table gives the illusion of a floating top

Height-adjustable work surface options include a 30-inch cantilever

Contrasting colors can be specified for inside storage cases

New material options add warmth and personality to workspaces

Sliding overhead door available in a range of materials and finishes

Wardrobe storage cabinet provides a convenient place to keep personal items.

Optional solid wood work surface celebrates the natural beauty of wood

Power access options include in-surface (shown), clamp-on, or inside the top drawer
