Reframe Lounge Furniture™

Refined comfort
for working lounge areas

Reframe Lounge Furniture

DESIGNED BY EOOS

Casual spaces that support collaboration are among the most popular spots to work in most offices. Even as the typical office footprint is shrinking, the popularity of these spaces keeps growing. Reframe Lounge Furniture brings comfort and a distinctive aesthetic to a mix of collaborative and individual work settings.

Functional Range

Reframe Lounge Chairs are available in three back heights. Low and open, the mid-back is designed to encourage conversation. The high-back offers a bit more support, while the wing-back goes even further, almost wrapping the sitter to encourage focus and limit peripheral distractions. Used thoughtfully across an office landscape, the Reframe family allows workers to choose the chair that suits the task at hand.

Internal Logic

Reframe Tables are unified by the same internal logic that allows all three Reframe Lounge Chairs to share a common base structure. Consisting of two structures and three top shapes—round, square, and rectangular—the Reframe Tables kit of parts can be used to create a range of coffee tables and side tables. Tabletops feature a crisp edge that curves smoothly into a reverse bevel, which provides a foil to the rounded tops of the legs—and a complement to the crisp upholstery lines of Reframe Lounge Chairs.

Harald Gründl, Martin Bergmann, Gernot Bohmann

About EOOS

"For us, design is a poetic discipline," says Gernot Bohmann, who, along with Harald Gründl and Martin Bergmann, comprise the design firm EOOS. Based in Vienna, Austria, these three have been making poetry together in the form of furniture, objects, and spaces since 1995.
