Taper™ Chair

The height of craft,  
the height of performance

## Geiger Taper Chair

DESIGNED BY MARK GOETZ IN COLLABORATION WITH DR. BROCK WALKER

Taper is an executive chair that offers the same high-touch, high-comfort, high-performance experience that business leaders might enjoy while driving a luxury automobile. It's streamlined design combines the depth of knowledge in ergonomics for which Herman Miller® is known with a fine-crafted feel that is unmistakably Geiger.

## Crafted to Perform

Taper's backrest is contoured to provide concentrated support in key areas to encourage people to adopt a more powerful seated posture: hips rotated forward, spine curved in a natural S-shape, chest open, shoulders back.

Research conducted by longtime Herman Miller seating advisor Dr. Brock Walker informed the shape and contours of the chair. Using his proprietary MEARS (Medically Engineered Active Response System) technology, Dr. Walker studied hundreds of subjects in order to better understand what the seated human body needs to be strong and comfortable.

## Considered Proportions

With a slender profile and balanced scale, the Taper Chair is inviting for a wide range of people and spaces. Its visual expression is simple and clean, and executed with the attention to detail for which Geiger is known. Every stitch is exactly where it needs to be to help the chair welcome the body and please the eye.

The suspended seat uses SuperSeat™ technology to create a deep seat pocket and responsive surface, improving comfort and circulation.

## About Mark Goetz

New York-based industrial designer Mark Goetz's contributions to the Geiger catalog include the Full Twist™ Chair, which challenged our manufacturing capabilities with its sculpted, flowing armrests. With the Taper Chair, which he designed in collaboration with Dr. Brock Walker, Goetz challenges industry expectations for performance in executive seating. This collaboration between design and medical disciplines resulted in an executive chair that balances Dr. Walker's work on enhancing human performance and comfort with Geiger's impeccable execution of clean, simple silhouettes.
