## Bristol™ and Tenera Leather Upholstery

INTRODUCING TENERA AND  
AN UPDATED PALETTE FOR BRISTOL

Leather enriches its immediate environment with an air of timelessness. Its surface is hardwearing, and with time, can develop a stately patina. Similar to wood, each leather hide has an individual story, making each Geiger piece unique.

Bristol leather has been a trusted staple in the Geiger suite for decades. For this full-grain, semi-aniline dyed leather, we've expanded the colorways available to 42. Our new range complements the varied palette of designer BassamFellows' Architectonic Color palette – rich colors inspired from pigments found in nature. This includes an expansion of whites and neutrals, brightly hued blues, oranges, and reds, and deeply saturated to almost black–deep aubergine, greens, browns, and navies.

Tenera leather is a thicker, more robust full-grain leather weighing approximately 3.5oz per square foot. Tenera possesses an enhanced grain to create a uniform, lightly pebbled texture. Like Bristol, the Tenera colorways complement the BassamFellows natural color palette with an array of autumnal hues that range from stone-tinged neutrals and greys to warmer sepia-hued mustards and browns with rich raspberry and terracotta reds.
